

Tomás Pinho

Curriculum Vitae

Experience

Jun 2026 - → **Head of Infrastructure**, *Lingokids*, Remote/Lisbon
Joined to build the SRE function from scratch; promoted to Head of Infrastructure after one year. Lead Build Engineering, IT Operations and Site Reliability Engineering (4 people). Expanded the team's mandate from infrastructure support into a business support function that drives automation of business processes across the company. Grew the team with a new SRE and a Senior IT Engineer. Completed the move of the company's entire infrastructure to code (Terraform), and am leading a move of CI on-premises to reduce dependency on third-party providers and de-risk delivery.

Jun 2025 - May 2026 **Staff Site Reliability Engineer**, *Lingokids*, Remote/Lisbon
Joined Lingokids as the first full-time SRE. Put together and led the implementation of a baseline InfoSec compliance plan. Identified infrastructure resources not in IaC and led a plan to codify all existing infrastructure. Implemented preview environments for Pull Requests, across mobile and backend repositories. Hired and mentored 1 mid-level SRE.

Jan 2025 - May 2025 **Director of Platform & Infrastructure**, *Remote*, Remote/Lisbon
Led a 19-person Platform & Infrastructure org spanning SRE, Developer Experience and Identity & Access Management (the latter two run as product teams). Managed 3 team leads and 3 Staff Engineers directly, and drove cross-org initiatives such as a large-scale code topology analysis and a frontend component framework that immediately unlocked $1M+ in revenue.

Dec 2022 - Dec 2024 **Director of Site Reliability Engineering**, *Remote*, Remote/Lisbon
Led and grew the SRE team to 5 engineers while owning reliability, infrastructure and compliance for Remote's production platform. Delivered a full migration of production infrastructure to a new AWS region, moving the core database (hundreds of GBs) and millions of user accounts with minimal downtime. Partnered across the org on software architecture, security, IT architecture and business-process automation.
Interim Director of Security (Apr 2023 - Mar 2024): led the Security team alongside my SRE role. Grew the team by hiring 2 engineers and bringing in an internal transfer, then recruited and onboarded the permanent Director of Security for a smooth handover. Under my leadership, the team achieved SOC 2 Type II re-certification, maintained ISO 27001 compliance, automated key compliance processes and launched a new company-wide Security Awareness Training program. Personally built and rolled out an access gate that blocks employees from sensitive applications until their security training and policy acknowledgements are current, turning compliance from a reminder into an enforced control and saving hundreds of hours of work ahead of re-certification.

Dec 2021 - Nov 2022 **SRE Manager**, *Remote*, Remote/Lisbon
Managed and grew the SRE team to 4 engineers across levels, owning compliance, developer productivity, infrastructure, scalability and security.

Jul 2021 - Dec 2021 **SRE Team Leader**, *Remote*, Remote/Lisbon
Hired the second SRE at Remote, established team processes including task tracking and support ticketing.

Mar 2020 - Jul 2021 **Senior Site Reliability Engineer**, *Remote*, Remote/Lisbon
Sole SRE, re-architected Remote's infrastructure for compliance, developer productivity, monitoring, scalability and security, including the move to Kubernetes on AWS EKS.

Mar 2019 – Mar 2020 **DevOps Engineer**, *Onfido*, Onsite/Lisbon
Senior engineer in the DevOps team, working on large-scale AWS infrastructure, Kubernetes and Terraform architecture across a growing engineering org.

Mar 2017 – Mar 2019 **DevOps Engineer / Team Lead**, *Unbabel*, Onsite/Lisbon
Led a 4-person team covering SRE, Security and IT. Owned the company's multi-cloud Kubernetes platform (AWS and GCP), CI/CD, observability and IT compliance.

Aug 2016 – Mar 2017 **Systems Administrator and DevOps**, *Optylon*, Onsite/Lisbon
Sole owner of the company's infrastructure, covering CI/CD, deployment automation, logging and security architecture.

Nov 2013 – Jul 2016 **Systems Administrator**, *RNL, Instituto Superior Técnico*, Onsite/Lisbon
Linux systems administration and configuration management for the university labs' infrastructure.

Education

2011–2016 **Master's Degree in Information Systems and Computer Engineering**, *Instituto Superior Técnico*, Lisboa, *Average of 16.5/20*
Specialization in Distributed Systems. Thesis: *UpdaThing - A secure and open firmware update system for Internet of Things devices*

Languages

Portuguese	Native	English	Fluent (C2)

Skills

Leadership	Engineering Leadership, People Management, Hiring, Large-scale Projects	Languages	Bash, Clojure, Elixir, Go, Java, JavaScript (Node.js), Lisp, PHP, Python
IaC/CI/CD	Ansible, ArgoCD, Docker, GitLab CI, Helm, Jenkins, Kubernetes, Puppet, Terraform	OSs	ArchLinux, Debian, Fedora, RedHat, Ubuntu, SUSE
Services	Apache, HAProxy, MySQL, MongoDB, NGINX, Postfix/Dovecot, PostgreSQL, RabbitMQ, Redis	Cloud/Virt	AWS EC2/EKS/Lambda/S3/Route 53/RDS/VPC, DigitalOcean, Google Cloud, KVM/libvirtd
Observability	Datadog, ELK, LogDNA, Prometheus, Splunk	Security	SOC 2 Type II, ISO 27001, Vault, Security Awareness Training, Pentesting

Interests

Academical	Scalable Distributed Systems, Information Security
Hobbies	Electric/Acoustic Guitar, Hydroponics, 3d Printing and CAD
